SWITCHCRAFT[®] "MINI-MIX"

A MINIATURE 2-INPUT AUDIO MIXER

The "Mini-Mix" permits the use of two microphones for special recording sessions. It can be used with tape, wire or disc recorders. The "Mini-Mix" will record music and voice simultaneously. Has separate volume controls to regulate audio input of each microphone. Controls recessed in housing.

Accommodates two high impedance inputs. "Mini-Mix" is a resistance type mixer—loss factor approximately 3 db. (When loss is a factor use Transistorized "Mix-Amp". See other side.) Brown finished case—nickel plated accessories.

Note: Pick-up can be made direct by attaching interconnecting cord to speaker terminals. Use convenient Switchcraft Interconnecting Cord with alligator clips on one end, phone plug on other.

(Use the Proper Switchcraft Interconnecting Cords to make connections.)

Consult Reference Guide on Page 12 to select proper "Mini-Mix" for your tape recorder.

Typical use of Switchcraft "Mini-Mix" and Interconnecting Cords to make a professional-like recording, mixing background music with your voice.

Half Size
Pat. No. 2,783,397

MIX LIVE VOICE AND INSTRUMENT

"DISC JOCKEY" YOUR FAVORITE RECORDS ON TAPE

RECORD VOICE WITH MUSIC BACKGROUND

TO MIX VOICE FROM 2 LOCATIONS

Available IN VARIOUS STYLES TO CONNECT TO MOST TAPE RECORDERS

Part No.	U.S.A. List Price	DESCRIPTION
#310	\$7.95	2-CONDUCTOR Phone Jack Inputs with 2-conductor Phone Plug Output fitting standard Jacks, such as used in some Recorders by Pentron, R.C.A., Wilcox-Gay, etc., where Jack is not recessed.
#311	\$8.95	Similar to No. 310, except has long 2-conductor plug output, long plug makes Mini-Mix suitable to recorders with Jacks recessed such as latest Wilcox-Gay, Webster Electric, V-M, etc.
#312	\$8.95	Similar to No. 310, except has special size plug and Jacks, designed for use with American Gelo Model G-255-S Tape Recorder.
#313	\$8.95	Special short plug output to fit microphone input jack. Inputs are special Jacks that accept short plug used with these recorders or standard 2-conductor plug without using adapter. For late models of Revere and Wollensak Recorders.

Part No.	U.S.A. List Price	DESCRIPTION
#315	\$7.95	Similar to No. 310, except with Female microphone connector for output. If used with No. 44 adapter also will fit Jack inputs.
#316	\$7.95	Phono Jax input, phono plug output.
#320	\$7.95	Male microphone connector inputs with female connector output.
#326	\$9.95	3-conductor Jack inputs, with long 2-conductor plug output and internal resistor network needed for use with Webcor Recorder Series 2020, 2110, and 2130.

MINIATURE TRANSISTORIZED AMPLIFIER

No. 501
Actual Size

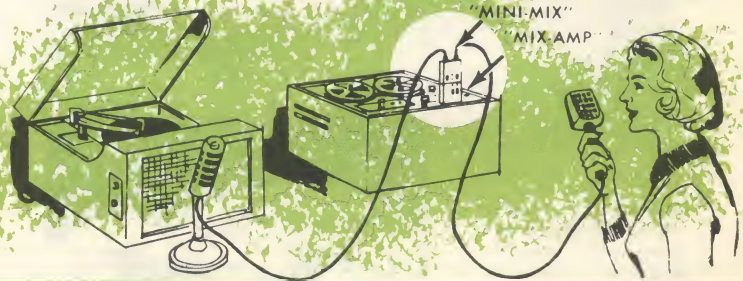

No. 501 "Mix-Amp" U.S.A. List \$20.00
Standard 2-conductor Phone Jack Input and 2-conductor Phone Plug Output.

No. 502 "Mix-Amp" U.S.A. List \$20.00
Same as No. 501, except input and output have microphone connectors (Switchcraft Series 2500 or Amphenol Series 75).

- Overcomes loss in resistance type Mixers.
- Can be used with a microphone in cable circuits up to 30 ft. long, without serious loss of high frequencies.

Designed for use with resistance type MIXERS, such as Switchcraft "Mini-Mix" and four-channel Microphone Mixers, overcoming the usual "losses" in such mixers and actually providing a 3 db. gain. When used with "Mini-Mix", will accept signals up to 2 volts.

Equipped with "HI-LO" Impedance Switch; in "HI" position, when used as a straight amplifier (without mixer) has a 200,000 ohm input and provides a 6 db. gain. In "LO" position has a 25 db. gain with input impedance of 5000 ohms. High impedance output. Compact, approximately size of package of cigarettes; completely portable; requires 9 volt battery (included). Frequency response 20 to 20,000 cycles. Also ideal for Phono pickups (Magnetic and Crystal). Brown finished case—nickel plated accessories.

"TRANSISTORIZED MIXERS"

4 channel high impedance mixers for feeding up to 4 signals such as microphones, tuners, phonos into a single output to a recorder or amplifier. Individual control for gain adjustment in each of 4 channels. Accepts signals up to 1.5 volts.

Equipped with built-in Transistor Amplifier powered by a 9 volt battery (included). Overcomes usual loss encountered in resistance type mixers and actually provides a 6 db. gain. Permits use of microphones up to 30 feet from recorder or amplifier. Low noise level, low distortion response. 20 to 20,000 cycles. Input Jacks accept standard 2 conductor Phone Plugs. Output Jacks accept standard 2 conductor Phono Plugs. Jacks are located on back of unit—no interference with volume controls. Modern styling, tan finish, brown knobs with gold metallic inserts. Rubber feet prevent scratching of finished surfaces.

TRANSISTORIZED STEREO-MONAUURAL MIXER

306TR (illustrated) . . . U.S.A. List \$37.50

Built-in transistor amplifier in each of 2 stereo channels. Switch permits use for either Stereo or Monaural.

With switch in Monaural position, 4 inputs can be used. Output Jacks are common.

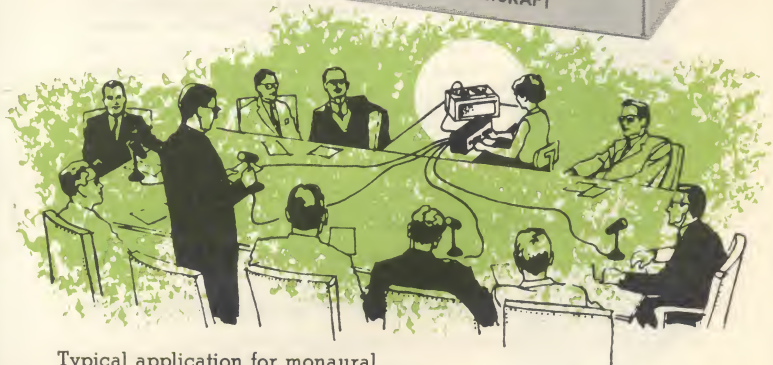

With switch in Stereo position, 2 Phone Jack Inputs in each of 2 Stereo channels can be used. Each channel has Phono Jack Output to amplifier or recorder. Requires one cable for each channel when used for Stereo. On-off switch to shut off amplifier when not in use lengthens battery life.

TRANSISTORIZED MONAUURAL MIXER

301TR U.S.A. List \$30.00

Similar to 306TR except one transistor amplifier. Can be used for Monaural only.

All units use Burgess No. 2U6 battery.

Typical application for monaural mixing of 4 microphones.

NON-TRANSISTORIZED RESISTANCE TYPE MIXERS

For use where a minimum of loss is not objectionable. No batteries required.

MONAUURAL MIXER

No. 301 U.S.A. List \$19.50

Construction and size same as 301TR except without transistorized amplifier.

CAUTION: Do not use either Transistorized or Non-Transistorized Mixers in output circuit to directly control the volume of individual speakers.

STEREO-MONAUURAL MIXER

No. 306 U.S.A. List \$22.50

Same as 301 except features Lev-R-Switch making it possible to use as a 4 channel audio mixer for Monaural or as two Stereo channels each having 2 separate inputs and 1 output to recorder or amplifier.

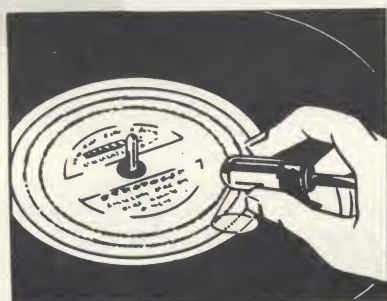

"STROBOLAMP"

Another *First* by Switchcraft

For checking speed of record players. Tells you if turntable is running too fast or too slow.

Speed Reading Made Easy—It is no longer necessary to rig up an argon, fluorescent or incandescent lamp—just use Switchcraft "Strobolamp" with 4-speed Strob-disc.

1. Simply place Strob-disc on record player turntable same as a record.
2. Set desired speed.

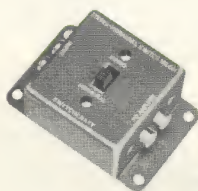

3. Hold "Strobolamp" over appropriate dots. When speed is correct dots will appear to stand still... If too slow, dots will appear to run counter-clockwise... If too fast, dots will appear to run clockwise... If speed is not correct, the record player needs adjustment. If your equipment does not have speed adjustment—see your service man.

"STROBOLAMP" Neon lamp molded to 6 ft. A.C. cord and plug, with Strob-disc.

Part No. 699

U.S.A. List Price \$1.95

STEREO-MONAUROAL SELECTOR

Simple and instant switching from monaural to Stereo. Two Phono Jax input and two Phono Jax output. Dual Channel feed through for Stereo (Outputs connected together in monaural position). Attractive tan finished completely shielded housing; can be mounted on cabinet or phono player. Complete with 4 mounting screws. Size 2" x 2" x 1".

Part No. 661

U.S.A. List Price \$3.00

STEREO-MONAUROAL SELECTOR WITH REVERSE

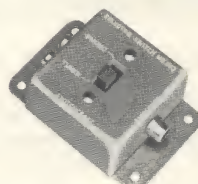

Same as above but with feature to provide channel reversing.

Part No. 662

U.S.A. List Price \$3.50

PHONO-TUNER ADAPTER

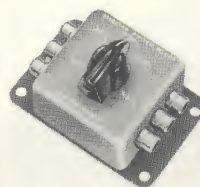

Old sound equipment with only one input can now be easily modernized with this Adapter. Two Phono Jax inputs can be used for phonos, tuners, etc.; Simple switch selects either input. There is a convenient phono output Jax for connecting to amplifier (use appropriate Switchcraft Cable Assembly to match your equipment needs; not included.) Includes mounting screws. Size 2" x 2" x 1".

Part No. 663

U.S.A. List Price \$2.50

MULTIPLE SELECTOR CONTROL

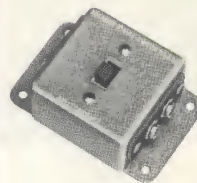

Accepts up to 5 Input circuits; selector switch connects any one of these five circuits to one output. Inputs are labeled—AM, FM, PHONO, TAPE, and AUX. Attractive tan finished completely Shielded Housing. Five input and one output Phono Jax. Mounts to wall or cabinet; complete with mounting screws. Size 2" x 2" x 1".

Part No. 664

U.S.A. List Price \$4.95

SPEAKER PHASE CONTROL

Attractive tan finished completely shielded housing. Ideal for multiple or Stereo Speaker installations to provide proper phasing of speakers. Complete with four mounting screws; can be mounted on cabinet or wall. Screw Terminals for ease of wiring. Size 2" x 2" x 1".

Part No. 665

U.S.A. List Price \$2.50

SPEAKER VOLUME CONTROL WITH L-PAD

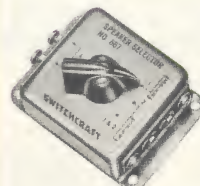

Attractive tan finished shielded housing with L-Pad Speaker Volume Control to reduce mismatch to amplifier at different volume settings. Ideal for mounting directly on speaker cabinet or at a remote position—5 Watts Peak Audio—8 ohm. Screw terminals. 2" x 2" x 1". Complete with instruction sheet and mounting hardware.

Part No. 666

U.S.A. List Price \$6.50

SPEAKER SELECTOR SWITCH

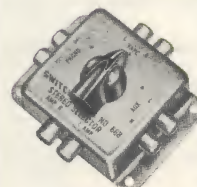

For connecting remote speakers to Radio, T.V. or Hi-Fi set. Permits listening enjoyment in every room. Three-position selector switch permits you to select either or both speakers at the same time. Attractive tan finish, completely wired—no soldering—ready to use. Screw terminals. Shielded housing, 2" x 2" x 1". Complete with instruction sheet and mounting hardware.

Part No. 667

U.S.A. List Price \$4.25

STEREO SELECTOR SWITCH

Now, with one switch you can select both channels of any one of three stereo sources, to one pair of outputs. It is no longer necessary to re-wire your system when you want to change sources.

Phono Jack inputs and outputs. Completely wired. Mounts on cabinet, record player, etc. Size 2" x 2" x 1". Complete with instruction sheet and mounting hardware.

Part No. 668

U.S.A. List Price \$6.25

STEREO VOLUME CONTROL

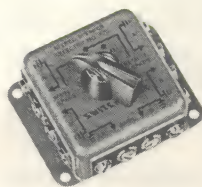

For high impedance circuits. Specially matched tandem control. This 2 ganged 1 megohm volume control was designed to be used as a master stereo volume or gain control for ceramic type stereo record cartridges, stereo tape decks, etc., when connected to separate amplifiers. Can also be used as dual-volume control on 2 microphones for stereo recording, etc. Phono Jack inputs and outputs. Size 2" x 2" x 1". Completely wired. Complete with instruction sheet and mounting hardware.

Part No. 669

U.S.A. List Price \$6.50

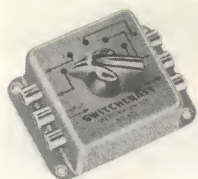

New STEREO SPEAKER SELECTOR SWITCH

Now, with a simple switch setting you can select both pairs of stereo speakers or one pair. Listen to wonderful stereo in your living room and/or den, recreation room, etc. This attractive tan finished unit is designed to connect 2 remote pairs of stereo speakers to a Stereo Amplifier. Three position selector switch permits you to select either or both pairs of Stereo speakers at the same time. Screw terminals.

Part No. 670 U.S.A. List Price \$6.25

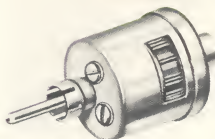

New MONAURAL SPEAKER SELECTOR SWITCH

Accepts up to five remote, monaural speakers. A 5 position tap switch allows you to connect any one of 5 speakers to a monaural amplifier. Inputs are labeled 1 through 5. Five inputs and one output Phono Jacks. Electrically the same as Part No. 664.

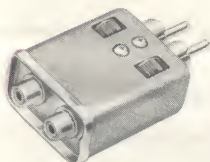

Part No. 671 U.S.A. List Price \$5.50

STEREO LINE BALANCE CONTROLS

Volume Control Adapter, Single Channel, High Impedance circuits only (Crystal Mic., Phono, Etc.). Phono Jack Input to Phono Plug output. Completely Shielded. Designed for use in unbalanced Stereo Channels; used in pairs for dual Stereo Channel control, (or use one #367 Dual Adapter). Completely Shielded; attractively Nickel Plated.

Part No. 366 U.S.A. List Price \$3.95

Dual Volume Control Adapter, Twin-Channel, High Impedance circuits only. Same as #366, except two Phono Jack inputs and two Phono Plug Outputs with separate recessed volume controls. Attractive tan finished completely shielded housing with Nickel Plated Accessories.

Part No. 367 U.S.A. List Price \$7.50

SPEAKER VOLUME CONTROL—8 OHM T-PAD

Designed for custom installations. Attractive natural brushed brass wall plates, for mounting on standard Outlet box. Constant Impedance T-Pad volume controls. Control speaker volume of Stereo, High Fidelity or P.A. System from any remote location. Rated at 4 Watts (15 Watts peak audio). Attractive Ivory Knob, black-white lettered escutcheon. Mounting centers 3 1/2". Plates size 2 3/4" x 4 1/2" x 1 1/8" deep. Screw terminals. Includes mounting screws and instructions.

8 ohm control, use for single 8 ohm speaker, or two 16 ohm speakers in parallel or two 4 ohm speakers in Series. No soldering—screw terminals.

Part No. 651 U.S.A. List Price \$9.95

Same as No. 651, except mounted on brushed stainless steel wall plate.
Part No. 651-S U.S.A. List Price \$9.95

Same as No. 651, except 16 ohm T-Pad control, use for single 16 ohm speaker, or two 8 ohm speakers connected in series. No soldering—screw terminals. Brushed brass.
Part No. 652 U.S.A. List Price \$9.95

Same as No. 652, except mounted on brushed stainless steel wall plate.
Part No. 652-S U.S.A. List Price \$9.95

SPEAKER VOLUME CONTROLS WITH JACK CONNECTION

The same features as above, but a special Jack on front panel permits use of external speaker or headphones. Jack accepts standard two conductor phone plug—if inserted to first detent does not cut off main speaker; when plug inserted to second detent main speaker is disconnected.

8 ohm control, with Jack.
Part No. 653 U.S.A. List Price \$12.00

16 ohm control, with Jack.
Part No. 654 U.S.A. List Price \$12.00

MULTI-SPEAKER SELECTOR SWITCH

A seven position switch mounted on an attractive natural brushed brass wall plate. Selects any of 3 speakers, all, or any 2 of 3, from this remote position. Mounts on standard Outlet box, or can be mounted on speaker cabinet; complete with mounting screws. Constant impedance regardless of switch position. Attractive Ivory Knob with black-white lettered escutcheon. Screw terminals. Wall mounting centers 3 1/2". Plate size 2 3/4" x 4 1/2" x 1 1/8" deep.

Part No. 655 U.S.A. List Price \$5.50

Same as No. 655, except mounted on brushed stainless steel wall plate.

Part No. 655-S U.S.A. List Price \$5.50

SPEAKER VOLUME CONTROL WITH QUALITY L-PAD

Has L-Pad Volume Control to prevent mismatch to amplifier at different volume settings. When turned all the way counter-clockwise, completely shuts off the speaker. Mounted on brushed brass wall plate. Fits standard outlet wall boxes. Attractive knob and escutcheon. Solder lug terminals. Size 2 3/4" x 4 1/2" x 1 1/4". 10 Watts Peak Audio—8 ohm. Complete with instruction sheet. Appearance same as No. 651.

Part No. 656 U.S.A. List Price \$6.95

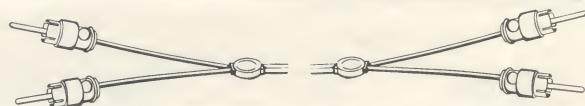

Same as No. 656, except mounted on brushed stainless steel wall plate.

Part No. 656-S U.S.A. List Price \$6.95

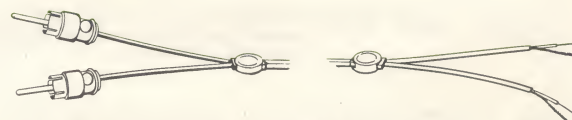

SPECIAL STEREO CABLE ASSEMBLIES

Two Shielded insulated cables inside a common chrome grey plastic jacket provide for two completely isolated channels. Separately insulated shields minimize the "ground loop" problem. Outer jacket sufficiently flexible so cable assembly may be "twisted" to reduce induced noise and hum.

Two inner jackets are of different color tones for easy identification of channels. Two separate Phono Plugs permit use of cable on all types of equipment regardless of spacing of mating Jax.

	New Part No.	Old Part No.	Length	U.S.A. List Price
2 Straight Phono Plugs on Each End; Grey Stereo Cable, Shielded.	25FF25	8901	36"	3.25
	25FK25	8902	6'	3.75
	25FN25	8903	10'	4.50

	New Part No.	Old Part No.	Length	U.S.A. List Price
2 Straight Phono Plugs on One End to Stripped and Tinned Ends; Grey Stereo Cable, Shielded.	25FF84	8921	36"	2.90
	25FK84	8922	6'	3.25
	25FN84	8923	10'	3.75

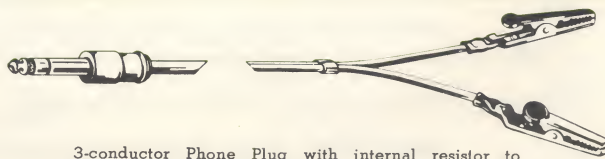

SPECIAL INTERCONNECTING CORDS FOR WEBCOR TAPE RECORDERS

New

3-conductor Phone Plug with internal resistor to Phono Plug. Shielded cable.
Part No. 11AK26 (Webcor No. 2925)
Length 6' U.S.A. List Price \$3.25

11AN26 10' \$4.00

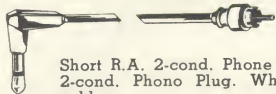

3-conductor Phone Plug with internal resistor to Alligator clips. Unshielded cable.
11CN86 10' \$3.25 (Webcor No. 2934)

SPECIAL ADAPTER AND INTERCONNECTING CORDS FOR USE WITH LATE MODELS OF REVERE AND WOLLENSAK TAPE RECORDERS

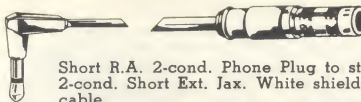

Adapter, Standard 2-conductor Phone Plug to 2-conductor Short. Ext. Jax.
Part No. 369 U.S.A. List Price \$2.00

INTERCONNECTING CORDS (Molded Cable Assemblies)

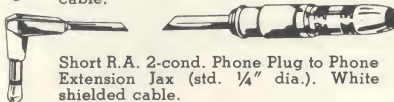

Short R.A. 2-cond. Phone Plug to std. 2-cond. Phono Plug. White shielded cable.
Part No. 12HK25 Length 6' U.S.A. List Price \$2.50

New

Short R.A. 2-cond. Phone Plug to std. 2-cond. Short Ext. Jax. White shielded cable.

Short R.A. 2-cond. Phone Plug to Phone Extension Jax (std. 1/4" dia.). White shielded cable.

Part No.	Length	U.S.A. List Price

12HR79	15'	\$5.00
12HU79	25'	\$5.95

12HD80	24'	\$3.95
--------	-----	--------

Part No.	U.S.A. List Price	DESCRIPTION
#25Y	\$1.65	A light weight die cast adapter makes it possible to connect 2 cables (with standard microphone connectors) in parallel to one single connector.
#44	\$0.50	**Male Microphone Input to Phone Plug Output.
#49	\$1.50	"Silent Plug", a 2-conductor plug featuring a circuit closing device when plug is removed from Jack. Same Applications as for #341 adapter described below. Similar to our No. 40 with 2" lg. Black Phenolic Handle. Patented.
<i>New</i> #151	\$1.35	A phone jack with extra long bushing for mounting in panels up to 1 1/4" thick. Ideal for microphone use. 2 cond. jack, mates with Switchcraft "Littell Plugs."
#152B	\$1.50	Same as above, except 3 cond. Mates with Switchcraft "Littell Plugs."
#169	\$1.75	Same as No. 49, but 1" long shielded handle.
<i>New</i> #328A	\$2.95	New small "Adapter" to connect Ceramic Phono Cartridge to audio amplifier designed for magnetic cartridge. Phono Jack Input (3501F) and Phone Plug Output (3501M).
#329	\$6.95	**"Microphone Volume Control Adapter"—For use in high impedance circuits to reduce or increase relative volume. Microphone connector input and output.
#330F	\$1.75	Y-Adapter, two Phono Jax Connectors connected in parallel to a standard Phono Plug. Completely Shielded.

FLEXIBLE "Y" CONNECTORS—(PHONO JACK AND PLUG TYPE)

For converting Stereo Player to Monaural. Can be used for a Tap-In Meter Monitor connection. Also required on some Tape Recorders.

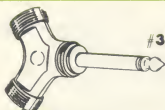

#330F1 \$2.00 Phono Plug connected in parallel to 2 Phono Jacks; Grey shielded cable. Length 4".

#330F2 \$2.00 1 Phono Plug connected in parallel to 1 Phono Jack and 1 Phono Plug; Grey shielded cable. Length 4".

#330F3 \$2.00 1 Phono Plug connected in parallel to 2 Phono Plugs; Grey shielded cable. Length 4".

#330M \$1.90 Y-Adapter, two male microphone Connectors connected in parallel to a standard two-conductor Phone Plug. Completely Shielded.

#330PJ \$1.90 Y-Adapter, two Phono Jax Connectors connected in parallel to a standard 2-conductor Phone Plug. Completely Shielded.

Part No.	U.S.A. List Price	DESCRIPTION
<i>New</i> #331A	\$15.00	*Adapter Kit consisting of 11 popular adapters and 1 versatile interconnecting cord in a handy plastic box. Includes one of the following: 25AF25, 25Y, 330F1, 332A, 334A, 336A, 336B, 345A, and two of: 44 and 349A.
#332A	\$1.75	Adapter, 2-conductor phone Jack Input to Female Microphone Output. Main body only 1/2" O.D. Attractively Nickel Plated. Coupling ring can be screwed back converting Mic Connector to male type. Completely Shielded.
#333	\$2.35	Standard 1/4" 2-cond. Jack Input to special plug that mates with Jack in American Gelo Recorder. Makes it possible to use domestic microphone and plugs with Recorder.
#334A	\$1.25	Adapter, Phono Jax Input to Female Microphone Connector Output. Main body only 1/2" O.D. Attractively Nickel Plated. Completely Shielded.
#334B	\$1.25	Adapter, Phono Jax Input to Male Microphone Connector Output. Main body only 1/2" O.D. Attractively Nickel Plated. Completely Shielded.
#335	\$2.95	Two Conductor—Input has connector Switchcraft 2501MP (Amphenol 75PC1M) and output connector Cannon XL-3-11. Adapter is complete with internal wire which is unsoldered at one end providing flexibility to permit the user to connect to terminal he will use.
#336A	\$1.45	Adapter, 2-Conductor Phone Jack Input to Phono Plug Output. Main body only 1/2" O.D. Attractively Nickel Plated. Completely Shielded.
#336B	\$1.45	Adapter, 2-Conductor Phone Jack Input to Phono Jack Output. Main body 1/2" O.D. Attractively Nickel Plated. Completely Shielded.
#338A	\$1.00	Adapter, Phono Plug one end with Male Microphone Connector at other end. Main body only 1/2" O.D. Attractively Nickel Plated. Completely Shielded.
#338B	\$1.00	Adapter, Phono Plug on end with Female Microphone Connector at other end. Main body only 1/2" O.D. Attractively Nickel Plated. Completely Shielded.
#339	\$2.95	Same as 335, but output connector Switchcraft 2501F (Amphenol 75-MC1F) to input connector Cannon XL-3-12.
#340	\$3.75	*Two 2-conductor Jack Inputs connected in parallel to a 2-conductor plug output. Actually a Y-adapter. Same as 310 Mini-Mix except no volume controls.

New

*Adapter Kit consisting of 11 popular adapters and 1 versatile interconnecting cord in a handy plastic box. Includes one of the following: 25AF25, 25Y, 330F1, 332A, 334A, 336A, 336B, 345A, and two of: 44 and 349A.

Adapter, 2-conductor phone Jack Input to Female Microphone Output. Main body only 1/2" O.D. Attractively Nickel Plated. Coupling ring can be screwed back converting Mic Connector to male type. Completely Shielded.

Standard 1/4" 2-cond. Jack Input to special plug that mates with Jack in American Gelo Recorder. Makes it possible to use domestic microphone and plugs with Recorder.

Adapter, Phono Jax Input to Female Microphone Connector Output. Main body only 1/2" O.D. Attractively Nickel Plated. Completely Shielded.

Adapter, Phono Jax Input to Male Microphone Connector Output. Main body only 1/2" O.D. Attractively Nickel Plated. Completely Shielded.

Two Conductor—Input has connector Switchcraft 2501MP (Amphenol 75PC1M) and output connector Cannon XL-3-11. Adapter is complete with internal wire which is unsoldered at one end providing flexibility to permit the user to connect to terminal he will use.

Adapter, 2-Conductor Phone Jack Input to Phono Plug Output. Main body only 1/2" O.D. Attractively Nickel Plated. Completely Shielded.

Adapter, 2-Conductor Phone Jack Input to Phono Jack Output. Main body 1/2" O.D. Attractively Nickel Plated. Completely Shielded.

Adapter, Phono Plug one end with Male Microphone Connector at other end. Main body only 1/2" O.D. Attractively Nickel Plated. Completely Shielded.

Adapter, Phono Plug on end with Female Microphone Connector at other end. Main body only 1/2" O.D. Attractively Nickel Plated. Completely Shielded.

Same as 335, but output connector Switchcraft 2501F (Amphenol 75-MC1F) to input connector Cannon XL-3-12.

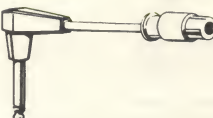

*Two 2-conductor Jack Inputs connected in parallel to a 2-conductor plug output. Actually a Y-adapter. Same as 310 Mini-Mix except no volume controls.

ADAPTERS—CONNECTORS

Part No.	U.S.A. List Price	DESCRIPTION
 #341	\$2.95	"Silent-Plug Adapter, 2-conductor Jack input to 2-conductor plug output, features a circuit closing device when plug is removed from equipment. Ideal for use with electrical musical instruments, example, removing adapter from electric guitar, automatically "shorts" input of amplifier eliminating "squeals" if plug accidentally touched. Patented.
 #342	\$2.60	Dual-Purpose Binding Post/Banana Jack Input to Phone Plug Output.
 #343	\$1.95	"Phono Adapters" — similar to our No. 250 "Littel Plug" with female phono jack in end of handle. Internal resistor circuit to adapt crystal Phono Pickup or pickup from terminals of radio or T.V. set to input of Tape recorder. For use as adapter with Magnetic Phono, open plug and twist together opposite leads of resistor.
 #345A	\$1.25	**Phone plug output with phono jack input. Attractive grey colored molded housing, completely shielded.
 #346	\$2.15	Tip Jack Input to Phone Plug Output.
 #349A	\$1.00	**Phono Plug coupler, mates with Phono plug at each end. Grey colored plastic: completely shielded.
 #361	\$2.25	Coupler, 2-Conductor Phone Jack in each end into which can be inserted a standard two-conductor Phone Plug. Ideal to connect two cables that had two-conductor Phone Plug terminations. Completely Shielded. Attractively Nickel Plated.
 #362	\$2.75	Coupler, same as #361, but has 3-Conductor Jacks in each end to connect together two assemblies with 3-conductor plugs.
 #363	\$2.00	Coupler, an unusual device that has two 2-Conductor Phone Plugs; to connect together two assemblies that had Extension Jax terminations. Completely Shielded.
 #364	\$1.45	Adapter, 2-Conductor Tini-Jax (See Switchcraft General Catalog for details on Tini Jax). Input to a standard size (1/4" O.D. Sleeve) Phone Plug Output. Attractively Nickel Plated. Completely Shielded Main body 1 1/8" O.D.
 #365	\$1.45	Adapter, 2-Conductor Tini-Jax (See Switchcraft General Catalog for details on Tini Jax). Input to a Phono Plug Output. Attractively Nickel Plated. Completely Shielded. Main body only 1 3/8" O.D.
 #368	\$4.50	*Input Volume Control Adapter, Phono Jax Input to a 2-Conductor Phone Plug Output. Built in volume control circuit, so that high volume signals such as phonos, tuners, etc., may be connected into the high gain Input Jax of Tape Recorders, without overloading recorder. Completely Shielded; Attractively Nickel Plated.
 #369	\$2.00	Adapter, Standard 2-conductor Phone Plug to 2-conductor Short Extension Jack. Attractively Nickel Plated. Completely Shielded. For use with late models of Revere and Wollensak Recorders.
 <i>New</i> #370	\$1.40	**Adapts standard phono plug to small "Tini-Plug". Consists of 2-cond. "Tini-Plug" (3/16" dia.) finger output to phono jack input.
 <i>New</i> #371	\$0.95	**Thick Panel Phono Jack Adapter. Special long bushing permits mounting of #3501P Phono Jax in panels up to 1 1/4" thick. Complete with hardware and instructions.

ADAPTERS—CONNECTORS PHONO PLUGS—PHONO JACKS MICROPHONE CONNECTORS

MICROPHONE CONNECTORS—PHONO PLUGS—PHONO JACKS

Part No.	U.S.A. List Price	DESCRIPTION
 <i>New</i> #372	\$1.75	Adapter. 2-conductor right angle molded phone plug connected to a long handle molded phono jax by a 2" grey shielded cable. Adapts phone jacks to phono plugs. For use on P.A. Amplifiers, Test Equipment, Speakers, etc., where space is limited.
 <i>New</i> #373	\$0.75	Adapter. 2-conductor long handle molded phono jax connected to 3' long grey shielded cable. To convert binding post, screw type or solder type terminals to quick connector type. Designed for converting Stereo Hi-Fi Amplifier screw type speaker terminals to standard phono jax. Mates with Switchcraft standard Phono Plugs #3501M, #3501MC, #3502.
 #2501F	\$0.60	**Female microphone connector. Single contact with coupling ring.
 #2501M	\$0.45	**Male microphone connector. Single contact.
 #2501MP	\$0.35	**Microphone panel connector. Single contact. Male type. Mounts in .385" hole.
#2501MPC	\$0.45	**Same as above, except closed circuit type.
 #2501FT	\$0.80	Adapter. Double female Microphone Connector for connecting 2 cables with male connectors.
 #2501MT	\$0.70	Adapter. Double male Microphone Connector for connecting 2 cables with female connectors.
 #2501FL	\$2.25	Straight Connector, 2 screw terminals, single contact female type. 2 piece handle with built in cable clamp. No soldering needed for connecting cables with stripped ends.
 #2501FS	\$1.65	Straight Connector, same as 2501FL, except no cable clamp, short handle.
 #3501F	\$0.15	††Phono Jax. 2 conductor.
 #3501M	\$0.10	††Phono Plug. 2 conductor.
 #3501MC	\$0.15	††Phono Plug—Cable Clamp Type.
 #3501FP	\$0.35	†Phono Jax. 2 conductor. For front of panel mounting.
 #3501FR	\$0.40	†Phono Jax. 2 conductor. For back of panel mounting.
 #3502	\$0.50	**Phono Plug. 2 conductor. Long screw on type handle provides easy grip. Cable clamp.
 #3503	\$0.60	**Phono Ext. Jax. Removable handle. Cable clamp, shielded.

RF PLUGS—RF JACKS PLUG-IN MICROPHONE CABLES "MOLDED CABLE ASSEMBLIES"

Part No.	U.S.A. List Price	DESCRIPTION
 #3504M	\$0.20	††RF-Plug. 2 conductor. Nylon insulator.
 #3505F	\$0.60	††RF-Phono Jack. 2 conductor. Nylon insulator. For front of panel mounting.
 #3506	\$2.00	Adapter-Connector. Coax connector (Amphenol 83-1SP) to RF-Jack, Switchcraft #3504M. For interconnecting R-F equipment to antennas.
 #3507	\$0.80	**RF-Plug. 2 conductor. Long screw-on type handle provides easy grip. Cable clamp. Nylon insulation.

MINI-CON CONNECTORS

Miniature microphone connectors for use with single conductor shielded cable.

 #5501F	\$0.60	**Straight Connector, single contact, female type coupling ring.
 #5501MF	\$0.45	**Panel Connector, single contact male type.

Part No.	U.S.A. List Price	DESCRIPTION
 #5501M	\$0.45	**Straight Connector, single contact, male type.
 #5501MP	\$0.35	**Panel Connector, single contact, male type.
#5501MPC	\$0.45	**Same as 5501MP, except shorting type.
 #525	\$0.25	**Color Tapes, for color identification of Phono Plugs, Jacks, etc., and to identify different Stereo Channels. Includes 6 different colored tapes.

New PLUG-IN MICROPHONE CABLES

New, extension "Plug-In" Cables. Easy, convenient way to add extra lengths of cables to most public address, tape recorder and studio microphones equipped with cable connector. Simply unplug present cable from microphone—plug in extension cable—connect your old cable to free end of extension. Each is 25 ft. long; 2 conductor, shielded.

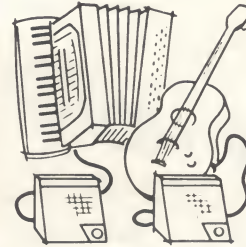

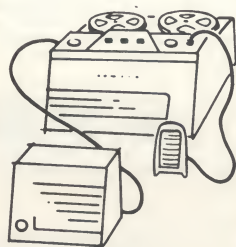

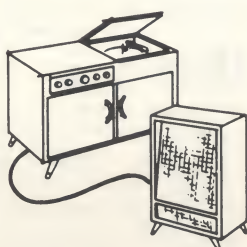

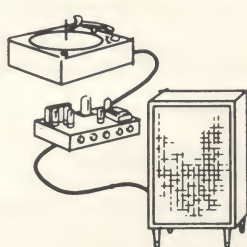

Part No.	U.S.A. List Price	DESCRIPTION
 91BU92	\$12.50	Cannon XLR3-11 & XLR3-12 Plugs
 93BU94	9.75	Amphenol MC3M & MC3F Plugs

"MOLDED CABLE ASSEMBLIES"

Unusual NEW DESIGN—Plugs Molded directly to various cable combinations, featuring:

1. An attractively designed grey plastic handle with a built-in complete electrical shield.
2. Built in cable clamps to support cable and eliminate strain on plug terminals.
3. Low Cost—economical to use.

4. Chrome grey shielded cable for the high impedance (microphone, etc.) connections.
5. Chrome grey paralleled wire for the low impedance (speaker, etc.) connections.
6. Wide variety of convenient combinations.
7. Packaged individually in clear plastic bags.

STRAIGHT 2 CONDUCTOR PHONE PLUG TO VARIOUS CONNECTIONS

Standard 1/4" diameter sleeve. Handle designed to "mate" with the jack even if the jack is recessed below the panel surface.

2 STRAIGHT PHONO PLUGS ON SAME END TO VARIOUS CONNECTIONS

SPECIAL STEREO CABLE ASSEMBLIES

Two shielded insulated cables inside a common chrome grey plastic jacket provide for two completely isolated channels. Separately insulated shields minimize the "ground loop" problem. Outer jacket sufficiently flexible so cable assembly may be "twisted" to reduce induced noise and hum.

Two inner jackets are of different color tones for easy identification of channels. Two separate Phono Plugs permit use of cable on all types of equipment regardless of spacing of mating jacks.

2 Straight Phono Plugs on Each End; Grey Stereo Cable, Shielded.

New Part No.	Old Part No.	Length	U.S.A. List Price
25FF25	8901	36"	\$3.25

New STEREO CABLE ASSEMBLY

10FK25

10FK25 CONNECTED TO
SWITCHCRAFT 306TR
STEREO MIXER AND
STEREO TAPE RECORDER

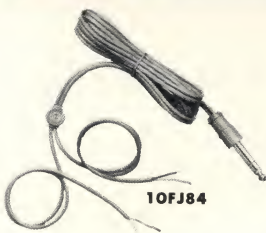

A new molded stereo cable assembly designed for use with Stereo Tape Recorders using 3-Conductor Dual Microphone Inputs such as Norelco, Webcor, Revere and Wallensak. Stereo Cable Assembly 10FK25, also provides a simple and easy way to connect a Stereo Mixer to Stereo or Monaural Tape Recorders without soldering, wiring or using tools.

A 3-Conductor Phone Plug to two color coded Phono Plugs. Grey plastic covered, shielded tandem cable.

Part No.	U.S.A. List Price	Description
10FK25	\$4.00	Molded Stereo Adapter Cable. Using tandem Stereo Cable. White Phono Plug wired to tip of Phone Plug, Grey Phono Plug wired to ring. Overall length, 6 feet.

New STEREO HEADPHONE CORD

10FJ84

10FJ84 SHOW CONNECTED
TO A STEREO HEADPHONE

New, low cost molded stereo headphone cord assembly that gives exceptional long-life, protects against shorts and is lightweight.

A direct replacement for cords used on Jensen HS-10 and KNIGHT KN-840 Stereo Headphones. Part No. 10FJ84 is also recommended for replacement on most other Stereo Headphones.

Standard 3-Conductor Phone Plug to stripped and tinned leads. Quality tandem shielded stereo cable.

Part No.	U.S.A. List Price	Description
10FJ84	\$2.95	Molded Stereo Headphone Cord 4' Cable from Phone Plug to "Molded Band" 1' Cable from "Molded Band" to Stripped and Tinned Leads; Grey.

HOW TO SELECT SWITCHCRAFT® "MINI-MIX" - "MIX-AMP" - "INTER Connecting" CORDS

...FOR TAPE RECORDERS

ALL Plugs and Extension Jacks are two-conductor, except No. 10 and No. 81, which are three-conductor.

STRAIGHT PHONE PLUG
No. 05 2-conductor

* In order to use 502 "MIX-AMP" on this recorder, it will require a 338A Adapter or a 25AB87 Molded Cable.

● Remote Jack requires three conductor Plug (Switchcraft No. 260).

□ SOME MODELS HAVE RECESSED PANELS, which need a Molded Cable (Part No. 12AB79).

† Single Jack with dual function.

‡ Has an auxiliary input Jack, use Switchcraft No. 260 Plug; connections are made to ring and sleeve only.

§ Uses four prong plugs on Input and Output circuits.

¶ Two position Jack, 1st position for Monitor, 2nd position for Extension Speaker.

⊠ Uses Switchcraft S280 Plug.

■ Special cables No. 11AK26 or 11CN86 are necessary on these recorders (USE NO OTHERS).

"MINI-MIX"—"MIX-AMP"—Model number of unit to fit particular recorder given in table below.

"INTERCONNECTING CORDS"—(1) Type of plug which fits inputs and outputs of Recorder are given in table. (2) Select the type of plug required for opposite end of cord, from the illustrations. (3) Cords available with various plug connections are listed in Switchcraft Catalogs.

NOTE: Cables used in Input Circuits must be Shielded. Cables used in Output Circuits can be either Shielded or Unshielded.

EXAMPLE:

Suppose you have a Recorder with a microphone input which requires a 2-conductor Phone Plug (05) and the equipment to be connected requires a straight Phono Plug (25), by referring to Switchcraft Catalogs for a list of standard Interconnecting Cords, you might choose Part No. 05AN25. Please note: The "alphabetical characteristics" (AN) in the part number refer to the type and length of cable and a change in this portion of the part number does not affect the end connections.
